1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 9-102721.

Fig 6 of JP 9-102721 shows the base as element 3, having a recessed portion (the region bounded by layers 16 and/or 18) with an inverse mesa shape, a quartz thin-film having a reed portion 7 formed on the face of the base opposed to the face having the recessed portion, and excitation electrodes 8 and 9 which mechanically support the reed portion 7.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note Fig. 1 of JP 2004-40198, and Figs. 1 and 4 of JP 2004-48582.
